## Detailing Packages

### Protection Detail | From £145

(1 Day Booking)

Small car £145, Saloon £195, SUV/estate £225

Firstly, the vehicle is pre-washed (indoors) using warm water and a citrus foaming agent and allowed to dwell for up to ten minutes safely removing all traces of loose dirt and grime from the exterior of the vehicle. Wheels cleaned with a non-acidic wheel cleaner. Then an initial wash using snowfoam (ph. neutral) is carried out after the snow foam is rinsed lamb's wool mitts in conjunction with warm water the vehicle is thoroughly washed down. We then chemically treat and the paint and exterior glass to remove any bonded surface contaminants such as tar spots, metal filings and tree sap, after hand and air drying of the car, the bodywork is clayed which leaves these surfaces feeling perfectly smooth. Non-correctional enhancement on bodywork. Wheels are then sealed using a sealant including glass and plastics and then the bodywork is then carefully cleansed and our one of a kind in house custom blend hybrid wax is applied left to cure in a temperature controlled environment giving approximately 3 months protection (this can be upgraded giving a 6 months protection at an additional cost of £50.00).

(This is not a paint correction to the vehicles bodywork)

## Enhancement Detail | From £295

(Minor Correction\*) (1-2 Day Booking)

Small car £295, Saloon £345, SUV/estate £395  
Any larger vehicles POA

This package was created for vehicles with minor paint defects to enhance the bodywork. This procedure includes the same wash process as the protection detail, chemical application to remove iron, Tar and tree sap from the bodywork followed by claying of the bodywork to remove the remaining particles adhered to the vehicle including glass and plastic. Then the bodywork is machined polished using abrasive compounds to correct swirl marks and oxidised paintwork which improves the vehicles bodywork appearance and ultimately reducing imperfections to 50% - 75%. Once the panels have been wiped down and inspected the bodywork is then carefully cleansed and a coating is applied in a temperature-controlled environment giving approximately 3 months protection. (This can be upgraded giving a 6 months protection at an additional cost of £50.00) The exterior glass is cleaned, and tyres dressed.

*\*For superior protection, a ceramic coating can be purchased as part of this detail at an additional cost please see the ceramic coatings bolt on page.*

## Dual Enhancement Detail | From £495

(2 Stage Correction\*) (2-3 Day Booking)

Small car £495, Saloon £565, SUV/estate £645

This package was created for vehicles with minor to moderate paint defects to greatly enhance the bodywork. This procedure includes the same wash process as the protection detail and also includes chemical application to remove iron, Tar and tree sap from the bodywork followed by claying of the bodywork to remove the remaining particles adhered to the vehicle including glass and plastic. Then the bodywork is machined polished using a medium abrasive compound followed by refining compounds to remove defects correct swirl marks, birdlime marks on lacquer and light scratches which oxidised paintwork which improves the vehicles bodywork appearance and ultimately reducing imperfections to 70% - 90%. Once the panels have been wiped down and inspected the bodywork is then carefully cleansed and a coating

is applied in a temperature-controlled environment giving approximately 3 months protection. This can be upgraded giving a 6 months protection at an additional cost of £50.00) The exterior glass is cleaned, and tyres dressed.

*\*For superior protection, a ceramic coating can be purchased as part of this detail at an additional cost please see the ceramic coatings bolt on page.*

## Multi Stage Detail | POA

This will restore your vehicle to showroom condition. A multi stage correction consist of several methods to ensure that all defects are removed safely as possible on the vehicle paintwork

On initial inspection of the vehicle, careful paint measurements will be made advising you of the limits to which this can be taken. This will ensure the safety of your paintwork over its lifetime.

*For further details please get in touch with Jason regarding this package.*

**New****CarPro Cquartz Professional**

(24-month minimum expectancy)

Small car £250, Saloon £275, SUV/estate £300

CQuartz Professional is based on Carpro's traditional siO2 quartz coatings with an updated formula infused with fluorocarbon composite materials which creates a dense protective quartz layer to shield your paint from the elements. This coating is Infrared Cured using heat lamps.

Swirl Resistance:

Waxes and sealants offer little to no swirl resistance. When you wash, dry, or touch your paint at any time you have the potential to scratch the surface. The scratches we are talking about here are very fine and referred to as "swirls" but as they build up the level of gloss you see as reflections and depth to your paint withers. These swirls refract light away from your eyes which is the cause of a dulled appearance to your paint. CQPro has been designed to resist these fine swirls when properly maintained and cared for. It should be noted that no coating is swirl proof and it is important to use only high-quality wash mitts and drying towels or a blower.

**Features:**

- Stays clean and glossy longer than traditional waxes
- Hard surface: Resistance to fine swirls and marring
- Resistance to brake dust and iron contaminants
- Resistance to bugs, tar, and bird bombs
- Resistance to UV and other environmental contaminants
- 2 Year Limited Warranty

**New****CarPro Cquartz Finest Reserve**

(36-month minimum expectancy)

Small car £350, Saloon £375, SUV/estate £400

Designed for the UK Climate CQ FINEST Reserve is an evolution in coating technology, unique in its design and hybrid resin. In the development of Finest Reserve, high strength, condensed nano particles with superior cross linking abilities were created utilizing a new proprietary nano material to create an extremely tough 3D structure providing a durable, high gloss coating which protects paint and other automotive surfaces from UVA and UVB rays, dirt, brake dust, iron contaminants, bugs, bird droppings, tar, and all sorts of environmental contaminants for more than 3 years. CQ Finest Reserve ushers in the future of automotive paint protection. This coating is Infrared Cured using heat lamps.

**Features:**

- Stays clean and glossy longer than other protection products
- Harder surface: Resistance to fine swirls and wash marring
- Self-cleaning affect - Dust blows off and dirt washes off easily
- Extremely low sliding angle ensure less water droplets stay on the surface.
- High resistance to brake dust and iron contaminants
- High resistance to bugs, tar, and bird droppings
- High resistance to road salt and acids.
- Resistance to UV and other environmental contaminants
- 3 Year Limited Warranty

**Coatings Additional****Additional to the bodywork ceramics mentioned above we can also coat:**

- Wheels Front face from £95 (based on wheel diameter)
- Wheels Front face and inner barrel from £125 (based on wheel diameter)
- Brake Calipers £35
- Exhaust tips £25
- Exterior Trims and plastics £50
- Engine bay components £50
- Door sills £25
